A brilliantly complex game. An excellent space warfare sim with a very high level of customization and control. Players even get to make their own ship designs. :) The developers are still actively maintaining and improving it too.. wasted 54 cents on this game. This game is great for short periods of waiting, or if you're nostalgic for sega genesis roguelike. 5V10 worth its price. it looks like that door was damaged by an explosion. you should be able to break through using the butt of your weapon press. B to perform a melee attack 3/10. I have 2 things why i dont like this game:

- ALL the DLC, its just greedy

- The Light Line/MonoRail build system, most of the times i cant finish the tracks because you need to perfectly align them with each other, and auto-complete doesn't help.

. DONT DRINK AND DRIVE, SMOKE AND FLY!. Quick and painless, Zup! 0.. God's Basement is fairly decent horror / walking sim. The graphics are good enough, the lighting in particular gives the game a nice feel. As some people mentioned, it's true the walking speed is slow (although you can 'run' if only for a short time) but I think the real highlight of this game is the story - I didn't expect the ending to be what it was and following the main character's life through journal entries and letters etc. shows how deep the story really is. I think my only issue with the game is the voice acting of the 'Operator', it just seems too forced and monotone. That and the fact it's sometimes hard to figure out what to do to be able to move on - but other than that, has a few scares, interesting environments and solid story.

this game is terrible, you cant even smoke weed or win in it.

420/10. "How does this game make you feel"

Quality game that's hard as all hell. Cute and adorable game, where you can totally decide a life of a little girl who used to be a fairy. You can make her a queen, a princess, a scholar, a soldier, a farmer, a criminal, an angel or a demon, depend on your decision and planning.

The game itself is pretty good, but Steam achievement system sucks. Several achievements I've already made still don't count on Steam, while some of achievements I never made are somehow already unlocked. I wonder when would they fix this problem..
Pretty good for a free game.

. Best dating sim that I own.
