<input type="checkbox"/>	O2 Signal 2 After-Cat.	
<input type="checkbox"/>	Battery Voltage	V
<input type="checkbox"/>	O2 Signal 1 After-Cat.	

This Immobilizer parameter shows the Universal code which is used temporarily to allow the starting of the car, when the Engine and Immobilizer ECUs are new and no keys have been programmed yet. (State RECEIVED) Once the keys have been programmed (at the new car delivery) the universal code gets disabled and the status changes to the normal ( NONE, PROGRAMMED ECU). If the keys have not been programmed yet and the universal code is not received, NOT RECEIVED will appear. NOTE: Three different conditions may occur:  
- Received: Blank Electronic Key ECU and ECU with no error on the Electronic Key.  
- Not received: Blank Electronic Key ECU and ECU with errors in the Electronic Key  
- Disabled: Electronic Key ECU and ECU already programmed.
